

Index of turnover in industry

2010, March

Turnover in manufacturing grew by nearly 4 per cent in January to March from the year before

According to Statistics Finland, in the January to March period of 2010 turnover in manufacturing was 3.8 per cent higher than in the corresponding period of the year before. Domestic sales grew by 0.6 per cent and export turnover by 6.5 per cent from one year ago.

Annual change in turnover in selected manufacturing industries during 1-3/2010, % (TOL 2008)

Source: Statistics Finland

Turnover went up from the corresponding quarter of the previous year in nearly all sub-industries of manufacturing. The strongest growths were recorded in electricity, gas, steam and air conditioning supply (29.8%), in mining and quarrying (24.5%) and in the chemical industry (23.4%). Turnover contracted slightly in only two sub-industries: the metal industry (-1.1%) and the textile, clothing and leather industry (-0.5%).

The index of turnover in industry describes enterprises whose main industry is manufacturing. The calculation of the indices is based on the Tax Administration's value added tax data which are supplemented with data obtained with Statistics Finland's sales inquiry. The monthly turnovers of manufacturing enterprises can vary considerably, especially in the metal industries. The variation is mainly due to invoicing practices. The final invoice for major machinery deliveries and projects may be recorded in the sales of one month, even if the delivery had required the work of several months or years.

Tax account reform causes revisions to the data of turnover indices

Starting from data on January 2010, the turnover indices will be compiled from data on the periodic tax returns allowed in the Tax Administration's tax account reform. According to our analysis the impact on these statistics from the implemented tax account reform will remain quite minor. However, slightly less data than before will be available for January 2010, which may mean that the January time series of the turnover indices become slightly revised in future releases. Further information about the impacts of the changes in the data on the turnover indices can be found under [Revisions in these statistics](#). Information about the tax account reform is also available on the Tax Administration's website at: www.vero.fi.
